Approved For Release 2002/10/16: CIA-RDP/TB00822780000000033 9 20016 22452 7 FEB 64 SECRET 4 NO NOTINE 25X TO . DIRECTOR FROM: ACTION: OSA TO . DIRECTOR FOR JOHN PARANGOSKY FROM KELLY JOHNSON 10 NOTINE 25X WE ARE DISCUSSING ACCEPTABLE FLIGHT PATH FOR SONIC BOOM MEASUREMENTS WITH OR COORDINATION OF ROUTE. WE SHOULD PROBABLY STATION ONE SET OF INSTRUMENTATION ALONG A CLIMBOUT PATH TO GET TRANSONIC BOOM DATA FOR ALITITUDES UNDER 50,200 FEFT, WHILE ANOTHER SET OF GEAR MIGHT BE PLACED TO MEASURE THE CRUISING CONDITIONS. AS DISCUSSED WITH HEADQUARTERS RECENTLY, WE WILL SEE WHETHER OR NOT WE CAN USE ONE SET OF EQUIPMENT TO DO BOTH JOBS WITHOUT OVERSHOOTING OUR APPROVED TEST AREA. NASA CREW DID NOT WRITE UP A FORMAL REPORT ON TEST DATA THEY HAVE COLLECTED TO DATE, BUT WE WILL TRY TO COLLECT SUCH INFORMATION AS IS AVAILABLE AT ONCE AND SEND TO YOU.	7.3	EDITIONS
